DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The references alone or in combination fail to teach following:

1. the specific self-dispersing pigment set forth in claim 1 in combination with a glycol ether in which a number of carbon atoms of an ethylene oxide moiety is not less than 8
2. a sulfonated self-dispersing pigment in combination with a glycol ether in which a number of carbon atoms of an ethylene oxide moiety is not less than 8
3. a self-dispersing pigment in combination with 2-pyrrolidone and tetraethylene glycol butyl ether and
4. a self-dispersing pigment in combination with tripropylene glycol butyl ether.

Therefore the references are not seen to teach or fairly suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
